Data Warehouse Developer

Buyers Products company, a leading manufacturer in the work truck industry, is searching for a detail-oriented, motivated professional to join our Business Intelligence team as a Data Warehouse Developer. As part of the Data Applications team, the Data Warehouse Developer will work closely with members of the IT/Business Intelligence team as well as business leadership to promote a data driven approach to solving business problems. This position requires a deep understanding of TSQL, database structures and administration, as the Data Warehouse Developer will be responsible for pulling data from a wide variety of business platforms to develop, maintain and optimize a data warehouse structure housed within in a Microsoft SQL environment. The Data Warehouse Developer will support the overall efforts of our Data Applications team, including structuring data sets in a way that facilitate analysis and support use in multiple visualization/reporting packages including Tableau, Microsoft Power BI and other applications.

Essential Duties and Responsibilities:
- Designs, implements and administers data warehouse database structures.
- Normalizes and Deduplicates overlapping data sets spanning multiple enterprise systems.
- Optimizes data structures to support effective reporting and provide fast query responses.
- Champions a data driven culture through the promotion of dashboards/reporting.
- Promotes best practices around data governance, security, privacy, redundancy, and integrity.
- Interacts with stakeholders to identify opportunities to improve efficiency, consistency, and control via the use of technology.
- Identifies, evaluates, and help to select software platforms.
- Documents technical procedures and solutions.

Qualifications:
- Ability to understand and create complex queries using TSQL.
- MS SQL Administration (versions spanning 2008-2022, Database optimization), SSRS.
- General Understanding of data visualization/reporting software is a plus.
- Experience in data analysis/analytics/business intelligence is a plus.
- Knowledge of Oracle databases is a plus.

Education and Experience:
- Bachelor's Degree in Computer Science or other technical field
- 5-10 years database experience

Communication Skills:

- Excellent oral and written skills
- Ability to work effectively with changing priorities in a dynamic environment
- Detail-oriented with strong analytical and problem-solving skills
- Comfortable interfacing with a broad spectrum of users

Physical Requirements and Work Environment:

• Mobility and dexterity to move around office setting including accessing file cabinets or storage and navigating to different workstations.

• Must be able to remain stationary for extended periods of time and engage in some repetitive motion.

• Standing, walking and sitting for extended periods of time.
